HT RED GREASE™

HIGH PERFORMANCE HIGH TEMPERATURE SPECIAL THICKENER GREASE

Muxx HT RED GREASE™ is a high temperature grease based on a proprietary soap thickener & specially selected high VI base oils which give lubrication beyond the temperature limitations of lithium and other soap-based grease. Because of the special high temperature agents, it does not melt at high temperatures like soap-based grease, thus resist softening & remaining in place providing good sealing and lubrication properties.

High dropping point of our thickener results in outstanding high temperature performance in applications of temperature up to 230 °C

FEATURES & BENEFITS:

Reduction in maintenance costs: Low coefficient of traction ensures reduced energy consumption potential.

Reduction in grease consumption: Excellent resistance to thermal/oxidative degradation coupled with the high temperature structural stability Resists water washout & preserves sealing.

High stability: High density ingredients helps preserve the grease structure for long term applications

PROPERTY	METHOD	RESULT
Appearance	Visual	Shiny Red
Soap	NA	proprietary
Kinematic Viscosity @ 40° C, cSt	ASTM D 445	100-680
Dropping Point	ASTM D2265	275
Copper Strip Corrosion Test	ASTM D130	Passes

These are typical figures and do not constitute a specification.

HANDLING AND STORAGE:

Handling: Use oil resistant gloves & wear safety goggles.

Storage: Store in a cool, dry, well-ventilated place and away from direct sunlight. Store away from all incompatible materials. Keep containers closed when not in use.

Shelf Life : One year from the date of manufacture, if the product is stored in the original container, unopened and dry, in a well-ventilated location.
